Thanks for the report on the Applied Fisheries Laboratory. This was very helpful and I was glad to go over the attached copy of its history and organization.

In spite of Donaldson's interest I think we will have to pass up the Bikini and Eniwetok surveys in 1951. I think we should go very slow in recommending any return of the natives to Bikini, as I can foresee the time when we may have enough contamination scattered around Eniwetok so that we may have to move back to Bikini for some of the work.

I was glad to hear about Biddulph's material. I would like to see his report. I would also like to know whether equally careful combing of control islands for tumorous material has been carried out.
